

Proportional reducing valves

direct, without transducer

RZGE-A, CART RZGE-A

Poppet type, direct, proportional pressure reducing valves for open loop pressure controls.

They operate in association with off-board driver, which supply the proportional valves with proper current to align the valve regulation to the reference signal supplied to the driver.

They are available in following executions:

RZGE: subplate mounting, ISO size 06

CART RZGE: M20 cartridge execution

The solenoids are certified according to North American standard **cURus**.

Size: **06** - ISO 4401 (RZGE); **M20** (CART RZGE)

Max flow: **12 l/min**

Max pressure: **315 bar**

Max regulated pressure: **210 bar**

For cavity CART RZGE see section **16**

4 GENERAL NOTES

Atos digital proportionals valves are CE marked according to the applicable directives (e.g. Immunity and Emission EMC Directive). Installation, wirings and start-up procedures must be performed according to the general prescriptions shown in tech table **FS900** and in the installation notes supply with relevant components.

11 AIR BLEEDING

At the first valve commissioning the air eventually trapped inside the solenoid must be bled-off through the screw ① located at the rear side of the solenoid housing.

The presence of air may cause pressure instability and vibrations.
